For the fair “**Agritec Africa**”, happening in Nairobi, Kenya, **NomaCool** will remotely showcase **insulation solutions** designed for the agricultural sector. Our **PIR sandwich panels** are the ideal choice for agricultural facilities, offering **superior thermal performance, fire safety, and durability**, all tailored to optimize storage, processing, and farm infrastructure.

Maximizing efficiency with PIR insulation at Agritec Africa

PIR (Polyisocyanurate) panels deliver **exceptional thermal efficiency**, crucial for ensuring **stable indoor climates** while reducing energy consumption in **agricultural buildings**. These panels maintain their performance over time, making them the perfect investment for long-term agricultural infrastructure.

- ✓ **Fire safety** – Our PIR panels are **B-S2-D0 certified**, ensuring **minimal smoke production** and **self-extinguishing properties**, making them ideal for farms and food storage.
- ✓ **Thermal performance** – With **superior U-values**, NomaCool panels **reduce heat loss**, maintaining optimal conditions year-round.
- ✓ **Durability** – **High-quality materials** ensure the panels stand up to the harsh conditions of the agricultural environment while providing **long-lasting protection**.

Why choose NomaCool PIR panels?

- ✓ **U-value** – NomaCool's **low U-values** ensure optimal **thermal efficiency**, keeping buildings insulated from the outside elements, and **reducing energy costs**.
- ✓ **R-value** – With an **R-value** of up to **5.58 m²K/W**, our panels offer **outstanding heat resistance**, perfect for maintaining stable temperatures in any agricultural environment.
- ✓ **Sustainable investment** – NomaCool panels are built to last, making them a **cost-effective solution** for agriculture infrastructure.

Tailored solutions for agricultural needs

- **Thicknesses and sizes** – Available in a range of thicknesses (**20mm to 120mm**) to meet diverse needs.
- **Custom colors** – Panels available in **white (RAL 9010)**, **grey (RAL 7016)**, and **red-brown (RAL 8012)**, with other custom options available to match your project.
- **Economical alternatives** – We offer **second-choice panels** that still deliver high performance, ensuring you stay within your budget without sacrificing quality.

Agritec Africa: A vital event for agricultural growth

Agritec Africa is one of Africa’s premier agricultural exhibitions, and it provides an excellent opportunity for professionals to engage with the latest **agricultural technologies** and innovations. As the agriculture sector continues to evolve, **NomaCool’s PIR sandwich panels** provide a **sustainable, energy-efficient solution** that supports growth, productivity, and profitability in the sector.

- **Contact us today** to explore how **NomaCool PIR panels** can benefit **your agricultural operations**. Send
