Africa's agricultural sector is evolving rapidly, with a strong focus on **efficiency, sustainability, and modern infrastructure**. **NomaCool** supports agribusinesses with **high-quality PIR sandwich panels**, ideal for warehouses, cold storage, and farm buildings.

Why insulation matters for agribusiness

Proper insulation is essential for maintaining stable temperatures, reducing energy costs, and protecting stored crops and livestock. **NomaCool's PIR sandwich panels** offer:

- ✓ **Superior thermal performance** – Our panels have **low U-values**, minimizing heat loss and improving energy efficiency.
- ✓ **High fire resistance** – With **B-S2-D0 certification**, our panels self-extinguish, emit low smoke, and do not drip during a fire, ensuring safer agricultural structures.
- ✓ **Durability & easy installation** – Designed for harsh climates, our panels are resistant to moisture, pressure, and temperature variations.

Tailored solutions for African agribusiness

NomaCool understands the unique challenges of African farming. That's why we provide:

- **Custom sizes & colors** – Various panel thicknesses (20mm - 120mm) and colors (white, grey, red-brown) to suit different applications.
- **Quick availability & delivery** – We maintain a large stock and ensure fast supply across Africa to meet growing demand.
- **Cost-effective options** – Second-choice panels available for budget-conscious projects, maintaining quality at a lower price.

Looking for reliable insulation solutions?

With Africa's agribusiness sector growing, having the right building materials is crucial for success. **NomaCool's PIR sandwich panels** provide the **efficiency, safety, and durability** needed for modern agricultural infrastructure.
